Press Release

January 13, 2021 | Vista, CA

Everest Solar Systems changes name to K2 Systems

Everest Solar Systems opened its doors in the U.S. in 2012, and just a few short years later opened a second office in Mexico. Now in 2021, they are changing their name to K2 Systems. The big question is why. Well, Everest has always been a part of K2 Systems, a solar racking manufacturer that began in Germany in 2004. Over the years, K2 expanded to different countries and when they decided to open in the U.S., they could not keep the same name due to trademark issues. For that reason, the company chose to stick with the mountain theme and name the American and Mexican branches, Everest Solar Systems. Fast forward to present day, there is no longer a trademark issue in the U.S. and Mexico, so the company can finally be a single brand worldwide. The U.S. has already acquired the trademark and has officially changed its name already, Mexico is soon to follow, but it still in processing.

What does this rebranding mean for you?

- ▶ Our product development process will remain the same. We have always worked with our worldwide teams to make sure our products are of the highest quality, but our branches work independently to identify the product needs of each specific market. Product names and part numbers will remain the same. New products will roll out as usual.
- ▶ Don't worry you will still have your regular sales representative. This is a name change not a buy-out. All employees will remain with K2 Systems, and you will still have your same point of contact.
- ▶ One company, one brand – we have been using both company logos across our media platforms and we will continue to do this into 2021 until we are recognized by all solely as K2 Systems.

K2 Systems

Everest Solar Systems was the U.S. and Mexico branches of K2 Systems, now they are unifying under the single brand K2 Systems. As a manufacturer of mounting systems for solar technology, K2 Systems has been developing innovative system solutions for the international photovoltaics industry since 2004. They have over 15 years of experience as roof top specialists and have installed over 16 GW worldwide.

210 employees work on cost-efficient and trend-setting mounting systems for roofs across the world at the German headquarters in Renningen and the seven branches in England, France, Italy, South Africa, Brazil, USA

and Mexico. International customers and partners are convinced by the high quality and functionality of the proven mounting systems for installation on pitched and flat roofs or for tailor-made projects.

The longstanding experience, service-oriented principles, as well as the personal touch in all dealings ensure that K2 Systems is the ideal partner.
