Base On Webinars Continue

Due to high demand K2 Systems is offering free webinars covering its own calculation software Base On for planning mounting system installations. In October and November six employees will host the webinars and present the online tool Base On, which is used to design and plan all standard K2 Systems mounting systems.

Step by step with the online tool

The free Base On tool enables the complete substructure design on flat and pitched roofs in only five steps. The webinar topics include the first steps, such as preparing the project or drawing the roof. Also included are planning module fields, thermal separations or obstructions such as, light couplings.

Planning the wind and snow loads is also part of the webinar content. The report produced with all the information on the assembly system and the design will be discussed in detail. There will also be enough time for questions and suggestions.

An important part of the K2 digital strategy

In combination with the website and the new K2 app, the development of Base On is an essential component of the company's digital strategy. The goal is to achieve easier and quicker planning and design with a combination of digital services and innovative products.

About K2 Systems

As a manufacturer of mounting systems for solar technology, K2 Systems has been developing innovative system solutions for the international photovoltaics industry for 13 years.

Approximately 117 employees work on cost-efficient and trend-setting mounting systems for roofs across the world at the German headquarters in Renningen and the six branches in England, France, Italy, South Africa, USA and Mexico. International customers and partners are convinced by the high quality and functionality of the proven mounting systems for installation on pitched roofs, flat roofs or ground mounted and special projects.

The longstanding experience, the service-oriented principles, as well as the personal touch in all dealings ensure that K2 Systems is the ideal partner.
