PV planning even faster and easier with the new K2 Base

The free online planning software K2 Base is available as of today in version 3.0 and enables an even simpler and faster design of the appropriate mounting system. A dashboard for efficient project management and an improved user interface are now available to all users. Furthermore, a new software architecture and the two interfaces to GoodWe's EzDesigner and archelios™ Pro ensure faster planning. The S-Dome 6 and D-Dome 6 for PV projects with flat roofs are also ready for design.

The new K2 Base 3.0 now provides the following new functions and operating elements:

▶ **Efficient project management with new dashboard**

The dashboard presents a direct overview of all planned, ongoing and completed projects. With useful filter options and short overviews for each project, the user always has everything in view.

▶ **Ease of use thanks to improved user interface**

The newly designed user interface ensures intuitive operation thanks to a clear layout, modern look and additional buttons for navigation.

▶ **Faster calculation through new software architecture**

The new version processes the data more efficiently in the background, making the calculation even faster.

▶ **Design of D-Dome 6 and S-Dome 6 System**

The user can now choose between the new 10° single-sided S-Dome 6 System and the double-sided D-Dome 6 System. Installation of the flat roof system is 50% faster thanks to improved, 80% pre-assembled components and the practical Dome Speed Spacer distance gauge for time-saving rail alignment.

K2 Base enables a complete planning in only five steps including assembly plan, static verification, and an article list. The intuitive user interface, the integrated national annexes and the connection to different inverter manufacturers make K2 Base a popular planning tool that is fun to use.

About K2 Systems

As a manufacturer of mounting systems for solar technology, K2 Systems has been developing innovative system solutions for the international photovoltaics industry since 2004.

180 employees work on cost-efficient and trend-setting mounting systems for roofs across the world at the German headquarters in Renningen and the seven branches in England, France, Italy, South Africa, Brazil, USA and Mexico. International customers and partners are convinced by the high quality and functionality of the proven mounting systems for installation on pitched and flat roofs or for tailor-made projects.

The longstanding experience, the service-oriented principles, as well as the personal touch in all dealings ensure that K2 Systems is the ideal partner.
