

Press release of K2 Systems and KOSTAL Solar Electric GmbH
13. May 2020 | Renningen / Freiburg i. Br., Germany

KOSTAL Solar Plan now connected with K2 Base

Fast transfer of project data for planning mounting systems and inverters

Thanks to the new interface between the two planning software K2 Base and KOSTAL Solar Plan, customers can now design even faster and easier.

At the end of planning the mounting system in K2 Base, the customer uses the K2+ function and receives the appropriate project file for direct import into the KOSTAL Solar Plan tool in order to proceed with the design of the PV and hybrid inverters. The simple transfer eliminates the need for multiple data entry, reduces the planning time and creates more time for consultation and installation.

The digital connection between K2 Systems and KOSTAL makes mechanical and electrical PV planning even easier and more convenient!

About K2 Systems and K2 Base

As a manufacturer of mounting systems for solar technology, K2 Systems has been developing innovative system solutions for the international photovoltaics industry since 2004. International customers and partners are convinced by the high quality and functionality of the proven mounting systems for installation on pitched and flat roofs or for tailor-made projects.

The longstanding experience, the service-oriented principles, as well as the personal touch in all dealings ensure that K2 Systems is the ideal partner. Equally important for the company are easy-to-install products and simple design in the free software K2 Base. Planning in just five steps, the intuitive user interface, integrated national annexes and networking with inverter manufacturers make K2 Base a popular planning tool.

About KOSTAL Solar Electric

KOSTAL Solar Electric GmbH is one of the leading suppliers of innovative solar inverters and storage systems for private and small commercial PV systems.

As a solution provider for intelligent energy generation and its use, the Freiburg-based company works closely with various partners, including from the smart home and e-mobility sectors. The solutions for the energy of the future are developed and produced in Germany to offer the highest quality standards. The experience of the KOSTAL Group, with more than 100 years as an automotive supplier, is of great benefit here. Smart connections for the customers.
