Assembly instructions

Insertion-System
Quality tested – several certifications

K2 Systems stands for secure connections, highest quality and precision. Our customers and business partners have known that for a long time. Independent institutes have tested, confirmed and certified our capabilities and components.

Please find our quality and product certificates under:
www.k2-systems.com/en/technical-information
Tools overview

- 3/4/5 mm
- TX25/40
- 7/9/13 mm
- 7/8.5 mm
- 14/15 mm

- 6 - 35 Nm
  (4.5 - 22.2 lb-ft)

- 3/4/5/6 mm
- 7/9/13 mm

- 15/19 mm

- ≥ 3.0 m
- ≥ 6.0 m
General safety information

Please note that our general mounting instructions must be followed at all times and can be viewed online at www.k2-systems.com/en/technical-information.

- The equipment may only be installed and operated by qualified and adequately trained installers.

- Prior to installation, ensure that the product complies with on-site static loading requirements. For roof-mounted systems, the roof load-bearing capacity must always be checked.

- National and local building regulations and environmental requirements must be adhered to.

- Compliance with health and safety regulations, accident prevention guidelines and applicable standards is required.
  - Protective equipment such as safety helmet, boots and gloves must be worn.
  - Roofing works must be in accordance with roofing regulations utilising fall protection safeguards when eaves height exceeds 3 m.
  - At least two people must be present for the duration of the installation work in order to provide rapid assistance in the event of an emergency.

- K2 mounting systems are continuously developed and improved and the installation process may thereby change at any time. Prior to installation consult our website at www.k2-systems.com/en/technical-information for up-to-date instructions. We can send you the latest version on request.

- The assembly instructions of the module manufacturer must be adhered to.

- Equipotential bonding/grounding/earthing between individual parts is to be performed according to country specific standards, as well as national laws and regulations.

- At least one copy of the assembly instructions should be available on site throughout the duration of the installation.

- Failure to adhere to our general safety and assembly instructions and not using all system components, K2 is not liable for any resulting defects or damages. We do not accept liability for any damage resulting in the use of competitor’s parts. Warranty is excluded in such cases.

- German law shall apply excluding the UN Convention on CISG. Place of venue is Stuttgart. Our General Terms of Business apply.

- If all safety instructions are adhered to and the system is correctly installed, there is a product warranty entitlement of 12 years! We strongly recommend reviewing our terms of guarantee, which can be viewed at www.k2-systems.com/en/technical-information. We will also send this information on request.

- Dismantling of the system is performed in reverse order to the assembly.

- K2 stainless steel components are available in different corrosion resistance classes. Each structure or component must be carefully checked for possible corrosion exposure.
The following guidelines apply

The Insertion system can be used without further testing by K2 systems in the following standard conditions. To calculate maximum distances between supports we recommend using our calculation tool K2Base. The system is also suitable for higher requirements. However, if a value exceeds the standard conditions, please contact K2 Systems.

Roof requirements

- The sufficient holding force of the roof covering at the support or substructure must be ensured on site.
- Roof pitch of 7 - 75°
- If the roof pitch is between 7° and 12°, the module must be secured with a module earthing clip or by pulling in a wire rope upwards in the insertion profile.

Structural requirements

The static verification of the component is automatically calculated with the K2 Base On planning software for the respective location. The design provided in a project report must be followed.

Important mounting instructions

- On-site general standards and regulations for lightning protection must be observed and consultation with a specialist to create a lightning protection concept is recommended (use lightning protection clamp if necessary). Country-specific regulations must be observed.
- The minimum distance between two assembled horizontal rails must be at least 7 mm.
- After a maximum of 18.3 m, the components must be thermally separated in the vertical rail direction and a new module field must be started with a new insert rail. The minimum distance between two vertical rails is 3 cm.
- To avoid tiles breaking under high snow loads, arrange for supporting the bracket with a suitable metal support plate.
- Do not step on roof hooks or rails, aren’t climbing assists.
- Dimensioning and positioning of the woodscrews subject to the European Technical approvals (ETA) of the screw manufacturers.
- Special requirements apply with on-rafter insulation or counter battening: special fit-for-purpose spacer screws have to be used.
Components

Insertion-System on pantiles

1. 2002390 / 2002402
   CrossHook 35+/45+

2. 1000642 / 1000656 / 1001525
   HECO-TOPIX wood screw 8x80/100/120 mm

3. 1000041 + 1000042
   T-Bolt M10x30, 28/15 and Hexagon flange nut with serration M10

4. Article number system-specific
   SolidRail Light 37 or Medium 42

5. 1004107 / 1004109
   SolidRail Connector Set Light 37/Medium 42

6. 2002762 / 2002763
   Cross Connector aluminium mill finish/black anodised

7. Article number system-specific
   InsertionRail 35/40 mm frame height; Length 5,10 m; aluminium mill finish/black anodised

8. 2002760 / 2002761
   InsertionRail EndStop aluminium mill finish/black anodised

9. 2002766
   InsertionRail FixStop

10. 2002764
    InsertionRail Connector
Optional components

11 2002767 InsertionRail CableClip
12 InsertionRail:
More heights on request!
13 2002397 TerraGrif S
Components

Insertion-System on corrugated fibre cement

1. Article number system-specific!
   - Hangerbolt with Adapter plate M10x200/250 and M12x200/250

2. 1000041 + 1000042
   - T-Bolt M10x30, 28/15 and Hexagon flange nut with serration M10

3. Article number system-specific!
   - SolidRail Light or Medium

All other components mounted above the SolidRail mounting rail are the same as on page 6.
