Press Release

August 2, 2021 | Vista, CA

Everest Solar Systems Mexico officially changes name to K2 Systems

Everest Solar Systems opened its doors in Mexico in 2015, as a branch of K2 Systems GmbH in Germany. Now in 2021, they are changing their name to K2 Systems. Everest has always been a part of K2 Systems International, a solar racking manufacturer that began in Germany in 2004. Over the years, K2 expanded to different countries and when they decided to open in Mexico, they could not keep the same name due to trademark issues. For that reason, the company chose to stick with the mountain theme and name the Mexico branch, Everest Solar Systems. Fast forward to present day, there is no longer a trademark issue, so the company is finally a single brand worldwide.

What does this rebranding mean for you?

- ▶ You may have noticed both the Everest and K2 logos across our media, we chose to do this to get people used to seeing the two brands together and recognizing that it is the same company. We will continue to do this until we feel everyone knows us solely by K2 Systems.
- ▶ Our product development process will remain the same. We have always worked with our worldwide teams to make sure our products are of the highest quality, but our branches work independently to identify the product needs of each specific market. Product names and part numbers will remain the same. New products will roll out as usual.
- ▶ Don't worry, you will still have your regular sales representative. This is a name change, not a buy-out. All employees will remain with K2 Systems, and you will still have your same point of contact.

The K2 Systems Vision

K2 Systems stands for worldwide power generation from solar energy.

The heart of the company is the development of installation-friendly mounting systems that are tailored to the needs of our customers, though the soul is the common spirit of all employees.

Together we define technical innovation and set new service standards for a sustainable future.

K2 Systems International

Everest Solar Systems was the U.S. and Mexico branches of K2 Systems, now they have unified under the single brand K2 Systems. As a manufacturer of mounting systems for solar technology, K2 Systems has been

developing innovative system solutions for the international photovoltaics industry since 2004. They have over 15 years of experience as roof top specialists and have installed over 16 GW worldwide.

210 employees work on cost-efficient and trend-setting mounting systems for roofs across the world at the German headquarters in Renningen and the seven branches in England, France, Italy, South Africa, Brazil, USA, Mexico and Australia. International customers and partners are convinced by the high quality and functionality of the proven mounting systems for installation on pitched and flat roofs or for tailor-made projects.

The longstanding experience, the service-oriented principles, as well as the personal touch in all dealings ensure that K2 Systems International is the ideal partner.
