## Various options for installing conduit with best practices

K2 Systems is proud to offer Conduit Clamp Kits. We have created four variations of this product to help you easily install conduit while keeping best practices in mind.

### [4000211 | K2 Conduit Clamp Flashing Kit w/EverSeal](#)

The first option is to install it on composition shingle roofs with the flashing kit. It comes with a small 5 x 8" metal flashing almost identical to the [K2 Flash Comp Kit](#). The flashing is smaller to allow for easier shingle installation. You can install the flashing to the roof decking so there is no need to find rafters. The clamp comes preassembled with K2 EverSeal butyl so you do not need additional sealant.

### [4000272 | K2 Conduit Clamp Kit, w/EverSeal](#)

The second option is to install the Conduit Clamp directly to the roof using a self-tapping wood screw. This option also allows you to install into the decking so there is no need to find rafters. This Clamp is also preassembled with K2 EverSeal butyl so there is no need for additional sealant.

### [4000278 | K2 Conduit Clamp SF, Kit](#)

The third option is specifically for our new South Face system arriving in a few weeks. You can install the Clamp directly to the South Face system using the hole directly on the chassis. This gives your conduit run significant height off the roof and protects wires from the roof surface and weather.

### [4000279 | K2 Conduit Clamp CrossRail Kit](#)

The final option is to install the clamp directly to the CrossRail channel using a T-Bolt. This option comes kitted with a T-Bolt and serrated hex nut. It is compatible with all CrossRail profiles. This option allows you to mount the conduit fast without disturbing the roof surface.

Whichever way you prefer to use it, the K2 Conduit Clamp is simple to install with a toolless snap fit design and is compatible with 3/4" or 1" conduit.

# Connecting Strength

## Universal Product Features

- / Stainless steel wire management accessory
- / ¾" or 1" conduit compatibility
- / Has 360° adjustability for running conduit
- / Secures with tool-less snap fit design
- / Submergence water tested

## The K2 Systems Vision

K2 Systems stands for worldwide power generation from solar energy.

The heart of the company is the development of installation-friendly mounting systems that are tailored to the needs of our customers, though the soul is the common spirit of all employees.

Together we define technical innovation and set new service standards for a sustainable future.

## K2 Systems International

As a manufacturer of mounting systems for solar technology, K2 Systems has been developing innovative system solutions for the international photovoltaics industry since 2004. They have over 18 years of experience as roof top specialists and have installed over 24 GW worldwide. 420 employees work on cost-efficient and trend-setting mounting systems for roofs across the world at the German headquarters in Renningen and the nine branches in England, France, Italy, South Africa, Brazil, USA, Mexico, Australia and Slovenia. International customers and partners are convinced by the high quality and functionality of the proven mounting systems for installation on pitched and flat roofs or for tailor-made projects. The longstanding experience, the service-oriented principles, as well as the personal touch in all dealings ensure that K2 Systems International is the ideal partner.
