### New interface in K2 Base:

## PV project data can now also be exchanged with Eternity

The digital interfaces to the software tools of key providers are a major advantage of the K2 Base planning software. In this way, PV project data can be transferred quickly and error-free. The installation manufacturer K2 Systems already cooperates with a large number of experts in the field of solar planning and now, shortly before the end of the year, direct data transfer with Eternity was added.

The K2+ function in the K2 Base planning tool automatically enables simple data exchange with the "Eternity solar expert" for every user. This is one of the leading all-in-one tools for planning and calculating PV systems in 3D in just a few minutes. The user receives complete sales documentation at the touch of a button. "Eternity's solar expert" is an ideal complement to K2 Base. With K2 Base, the planner can determine the optimal and statically tested design of the mounting system for pitched and flat roofs in just five steps.

"We are delighted that, true to our claim "Connecting Strength" 2023, we have been able to combine even more strengths. With the solar expert, Eternity offers installers, municipal services and energy suppliers a planning tool that supports system planning including load profiles, the preparation of offers and their realisation. It is another step in the same direction as the successful collaboration with SolarEdge, SMA, Fronius, Kostal, GoodWe, PV\*SOL premium and archelios™ Pro in terms of targeted interfaces to drive forward the energy transition", says Willem Haag, Co-CEO of K2 Systems, explaining the new cooperation.

*The new interface to the Eternity solar expert is available to users free of charge via the K2+ function in K2 Base.*

**About K2 Systems:** We connect strengths: innovative mounting systems, digital technology and people with the know-how and energy to drive sustainable solutions.

Since 2004, K2 Systems has stood for global power generation from solar energy. The heart is the development of easy-to-install mounting systems that are precisely tailored to the needs of our customers. The soul is the common spirit of all employees. Together, we define technical innovation and set new service standards digitally as well.

At our headquarters in Renningen and our nine international locations, we develop and sell mounting systems together with 400 employees for the roofs of this world.
