K2 Systems Spain joins UNEF and APPA - two key associations in the PV sector

Just a few months after opening its new site in Valencia, K2 Systems is thus emphasizing its commitment to the Spanish photovoltaic sector by joining two important Spanish associations: UNEF (Unión Española Fotovoltaica) and APPA (Asociación de Empresas de Energías Renovables).

The company chose to join these important associations because of their expertise, long experience in the photovoltaic sector, and in-depth knowledge of the companies and players involved in it. K2 will thus be able to feel supported during the long journey towards raising awareness of the use of sustainable energy sources: "Through this collaboration, we will continue to promote the adoption of photovoltaic technologies and actively participate in building a more sustainable future"- says Miguel Giménez Castillo, Country Manager of K2 Spain and Portugal.

But that's not all: the decision to become a member of UNEF and APPA is also due to the strong internationalization that characterizes the two associations. In fact, they collaborate with international associations to strengthen Spain's presence in the global solar energy industry. The networking element is also crucial: thanks to the many partnerships and people orbiting these large associations, K2 will be able to 'connect' with more and more people in order to share ideas and projects so that interaction with the key players in the photovoltaic industry will be more active and engaging.

Miguel Giménez Castillo continues: "We look forward to continuing to grow with UNEF and APPA. As a company, we are committed to protecting the environment and combating climate change. For 20 years, K2 has been working to lead the energy transition prioritizing recycled materials and sourcing mainly in the EU to reduce environmental impact. We are very pleased that this membership in UNEF and APPA reinforces our determination to contribute to the development of cleaner and more efficient energy solutions."

Miguel Giménez Castillo, Country Manager of K2 Systems Spain and Portugal

Connecting Strength

K2 Systems GmbH is one of the world's leading manufacturers of photovoltaic mounting systems with twenty years of experience. Founded in 2004 and headquartered in Renningen near Stuttgart, the company offers universal components for flat and pitched roofs that are easy to install, durable and safe. The company's portfolio also includes mounting systems for façades, ground mounts and carports. Digital services, such as the K2 Base planning software, support the process, making PV projects quicker and easier.

K2 Systems develops in Germany, manufactures predominantly in Europe, and focuses on a sustainable sourcing strategy. PV systems with K2 substructures are in use in over 130 countries and generate approximately 110 GWh per day. The heart of its strategy is the development of easy-to-install mounting systems that are precisely tailored to the needs of customers. With around 420 employees at twelve global locations and in close cooperation with international partners, the company is working towards the vision of global electricity generation from solar energy. This is how K2 Systems is driving the energy transition.
