K2 Systems Integrates K2 Quote into Aurora to Streamline Racking Design and BOM Generation

K2 Systems, the engineering leader for solar mounting system solutions, is excited to announce a new integration allowing solar installers to utilize K2 Quote directly within the Aurora platform. This collaboration empowers users to design their racking systems entirely within Aurora, generating a comprehensive Bill of Materials (BOM) without the need to switch applications.

By enabling permissions on the Aurora platform, K2 Systems allows users to access K2 Quote seamlessly through Design Mode. Aurora users can choose the best racking equipment and combine both racking and system details into a single, unified BOM, streamlining the entire design and ordering process.

Key benefits of the integration include:

- **All-in-One Design Environment:** Solar installers can complete their entire design process, from racking selection to BOM generation, all within the Aurora platform.
- **Automatic BOM Generation:** A comprehensive BOM is created automatically, minimizing errors and saving time for users.
- **Unified System Details:** Combine racking and system specifications into a cohesive BOM for easier management and ordering.

"We are excited about this partnership and are committed to making the design-to-permit process more efficient for our customers by integrating Aurora's leading design software with K2 Systems design tools," said Andy Neshat, CEO of K2 Systems. "This collaboration provides solar installers with a complete solution on a single platform, enhancing their overall design experience."

The integration is now available for all Aurora customers. For more information or to schedule a demo, visit aurorasolar.com or contact us at baseus@k2-systems.com.

The K2 Systems Vision

K2 Systems stands for worldwide power generation from solar energy. The heart of the company is the development of installation-friendly mounting systems that are tailored to the needs of our customers, though the soul is the common spirit of all employees.

Together we define technical innovation and set new service standards for a sustainable future.

Connecting Strength

K2 Systems International

As a manufacturer of mounting systems for solar technology, K2 Systems has been developing innovative system solutions for the international photovoltaics industry since 2004. They have over 20 years of experience as roof top specialists and have installed over 32 GW worldwide.

420 employees work on cost-efficient and trend-setting mounting systems for roofs across the world at the German headquarters in Renningen and the nine branches in England, France, Spain, Italy, Sweden, South Africa, USA, Mexico, Australia and Slovenia. International customers and partners are convinced by the high quality and functionality of the proven mounting systems for installation on pitched and flat roofs or for tailor-made projects.

The longstanding experience, the service-oriented principles, as well as the personal touch in all dealings ensure that K2 Systems International is the ideal partner.
