

Key Facts

Sustainability at K2

Focus on Regional Sourcing

We are strongly committed to reducing transportation costs, strengthening European value creation, lowering CO₂ emissions in industrial manufacturing, and reliably upholding high social standards.

Suppliers

 **85 %**

of our suppliers are located in the EU

- 80 % use renewable energies
- 71 % are ISO 14001 certified
- We take a strategic and sustainable approach to systematically develop high-performing suppliers, and select partners that actively drive sustainability and CO₂ reduction

Products

- 4,8 t: average CO₂ value for the aluminum used in our products (2024)

Product Carbon Footprints (PCFs) for initial aluminum products are available on request. For example, we can provide information such as:

	SingleRail 36*	BasicRail 22*
Raw material extraction (aluminum billets) per kg of aluminum	3,63 kg CO ₂	3,76 kg CO ₂
Share of supplier data:	ca. 90 %	ca. 93 %
Manufacturing/extrusion per kg of aluminum	0,77 kg CO ₂	0,66 kg CO ₂
Share of supplier data:	ca. 88 %	ca. 89 %

- Our warranties of up to 20 years attest to the high durability and quality of our products
- The majority of our product portfolio consists of aluminum, which can be reused multiple times under suitable conditions.

**Average for all lengths*

Company

Locations

 **100 %**

Supply of green electricity and around 80 % share of renewable energies**

- DGNB Gold certificate for the new building*
- Fully electrified intralogistics:
- 100 % electric forklift trucks powered by renewable energy*
- 736 kWp of installed PV capacity on roof and facade surfaces*
- 23 % of total water consumption covered by rainwater*
- Corporate carbon footprint: calculation of Scopes 1 and 2

 **88 %**

Electric vehicles in the K2 fleet

- 23 EV charging stations and 2 fast-charging stations*
- Support for public transport and e-bikes through mobility allowances

Team

- Over 40 nationalities with more than 30 languages
- We embrace diversity in terms of age and professional background and leverage it specifically as a driver for innovation, creativity, and diverse perspectives.
- Internal sustainability team since 2023 (*sustainability@k2-systems.de*)

Corporate culture

- Publication of the first sustainability report in Q2 2026
- **Internal sustainability competition** ("Eco Warriors Battle") since 2024 to promote and anchor sustainability in the organization
- Sustainability firmly embedded in the **Code of Conduct**
